## Fibromyalgia Relief!

I have suffered with fibromyalgia and related symptoms for over 15 years, including chronic fatigue and pain that limited me from being active with my family and attending social functions.

After I was diagnosed with Fibromyalgia by my medical doctor. I was in pain every day, 24/7. Last November on Thanksgiving I could not even get out of bed, I was in so much pain. I decided to take a friends advice and call Dr. Mike's office for treatment.

In April I retired from my job of 33 years and because of Dr. Mike's care, I was able to go to Las Vegas for Thanksgiving with my eldest son, a trip that I was not able to make the previous Thanksgiving.

I have told all of my friends about chiropractic care! It works, it really does. It has had a better affect on my health than the many medication's my doctors put me on, which I no longer have take.

One thing that people need to understand is that Chiropractic Care takes time. You need to be patient. The care takes time; it's not an overnight process. The main thing is sticking with it and believing in your care."
